| IDENTIFIERS | *State University of New York |

ABSTRACT

The Academic Program Information System (APIS), an inventory of all adacemic programs at the State University of New York (SUNY), is the basis for two major reports contained in this publication. The two APIS reports provide enrollments and degrees-granted data for each program at each instituion of SUNY. Enrollment data are point-in-time information. Total enrollments and full-time enrollments are given for Fall 1975, 1976 and 1977. Degrees granted data are provided for the years 1974-75, 1975-76, and 1976-77. The variety and number of academic programs made it necessary to aggregate individual programs into clusters for summarizing statistical data. Individual programs are clustered on the basis of their subject matter. Programs are also organized by clustering the approximately 60 different degree designations currently offered by SUNY into seven award levels: undergraduate certificates and diplomas, associate degrees bachelor's degrees, master's degrees, doctoral degrees, first-professional degrees, and graduate certificates. The first report (APIS-8) in this publication is organized by campus; the second report (APIS-9), by award level. Enrollment data included is not the total official credit course enrollment for each institution, but the total enrollments of students in a program. Tables are provided showing the total credit course enrollment for each institution and separately identify those students in a program and those not in a program. (LBH)

# INTRODUCTION

The historical antecedents of this report lie in a series of three separate publications first issued by this office in 1968 and 1969, earlier Master Plan documents, and other reports published intermittently since then; these reports arrayed the academic programs offered by the University's campuses, enrollments in these programs and degrees granted in these programs. Since then the University has developed a unified data base for maintaining academic program data which incorporates all of the above and includes other refinements as well. This system is named the Academic Program Information System—APIS. A variety of reports from this unified system have been available on request since 1975. The purpose of this publication, although it is voluminous, is to share this essential information with the entire academic community.

The APIS system is an inventory of all academic programs at the State University of New York. This file contains the official name of every program offered by the State University, the campus(es) at which the program is available, the award given on completion of the program, federal H.E.G.I.S. (Higher Education General Information Survey) and State University taxonomic codes, dates of program deactivation or discontinuance as appropriate, and additional information serving a variety of administrative needs. The APIS file is the point of departure for the collection of all data which is to be arrayed by academic program. In particular, it is used as the basis for collecting annual enrollment and degrees granted statistics. When these data are collected, they are entered on the appropriate record of the file. Consequently, each program record on the APIS file contains enrollment and degrees granted data in addition to the other items mentioned. Historical as well as current data is recorded on the APIS file. Because this file contains the University's official list of approved programs, it provides the system-wide framework for collecting, maintaining and disseminating data on academic programs in order to meet a variety of State and Federal data reporting requirements as well as serving the internal needs of the University including the review of requests for program additions or eliminations.

The APIS system is the source of a number of reports. This publication contains two of the major reports (APIS-8, APIS-9) generated from the APIS system which provide data on enrollments and degrees granted by academic program. Because of the volume of data included in this publication, efficient use of the report requires an overview of its organization and general structure.

The two APIS reports in this publication provide enrollments and degrees granted data for each program at each institution of the State University. The two reports differ in the way in which the academic programs and their associated enrollments and degrees awarded are organized—this difference in organization will be explained later.

Enrollment data are point-in-time information. Total enrollments and full-time enrollments are provided for Fall 1975, 1976 and 1977. Degrees granted data are provided for the years 1974-75, 1975-76, 1976-77. The actual census period is from July 1st through June 30th—e.g., the 1975-76 degrees granted year is from July 1, 1975 through June 30, 1976.

The variety and number of academic programs makes it necessary to aggregate individual programs into clusters in order to permit summarized statistical data. Individual programs are clustered on the basis of their subject matter. A subject matter clustering of programs in this report is accomplished by utilizing the program taxonomy which was initially employed in this office's enrollment by program reports dating back to 1968-69. However, while aggregated information is provided for program clusters, the detail of all individual programs is retained—that is, no individual programs are suppressed in favor of aggregations of programs. The taxonomic groupings which are used to accumulate intermediate summary data by clustering individual academic programs are as follows:

Agriculture and Forestry
Applied Arts
Architecture & Related Professions
Arts
Biological Sciences
Business
Education
Engineering, Applied Sciences & Technologies
Health Sciences, Professions & Technologies
Home Economics, Food Sciences, Arts & Technologies
Humanities
Law
Liberal Arts and General Studies
Library Services and Professions
Mathematics
Physical Sciences
Public Services and Professions
Social and Behavioral Sciences
Veterinary and Animal Sciences

In a program but major not chosen*

---

*This "category" is used to include all students who are in a program but have not yet selected a specific major.

Unlike other taxonomies which utilize a mixture of subject matter and level of study concepts, the above taxonomy makes no distinctions based on level of study, e.g., the first-professional program in medicine and the associate degree in Nursing are both classified as "Health Sciences, Professions & Technologies". Because a distinction based on level of study regardless of subject matter is useful, programs are also organized by clustering the approximately 60 different degree designations currently offered by the State University into seven award levels as follows:

Undergraduate Certificates & Diplomas

Associate Degrees

Bachelor's Degrees

Master's Degrees

Doctoral Degrees

First-Professional Degrees

Graduate Certificates

The report in Part I (APIS-8) of this publication is organized as follows. Programs are listed within campuses, and within campuses they are grouped by award level, taxon and lastly the individual programs and awards are listed alphabetically within taxon. That is, the report is organized as follows:

CAMPUS

AWARD LEVEL

TAXON

PROGRAM

The following sample page from the report illustrates the organization just described.

There are two varieties of footnotes used in this report. The first type refers to the actual enrollment and degree data entered against a program. The key to the footnote is a letter entered in a data column; the text of the footnote is printed below the program name and is prefaced by the appropriate letter key. The second type of footnote refers to the program itself; the key to this type of footnote is a number in angle brackets printed after the program name. The numerical key and footnote text are printed on the bottom of the page. The two types of footnotes are indicated on the following sample page.

<1>PROGRAM DEACTIVATED 09/76; DISCONTINUANCE EFFECTIVE 09/78.

<2>PROGRAM DEACTIVATED 06/76; DISCONTINUANCE EFFECTIVE 06/78.

There is a separate table of contents for the two reports, and they reflect the differences in the organization of the reports. The table of contents for Part I (APIS-8) provides page references for each campus and award level, that for Part II (APIS-9) provides page references for each award level and taxon.

In examining the data in these reports a number of caveats are in order. Care should be taken in interpreting programs which show no enrollment or degrees granted activity over a period of time. This situation may occur for a variety of reasons—e.g., the program may be a recently approved program for which enrollment data has not yet been obtained; the program may have been formally deactivated thereby closing it to new enrollees in which case a footnote to that effect will be displayed; enrollments in a program may be reported against a related program; for example, enrollment activity in *English BS* might be consistently reported against *English BA*, enrollments in an educational certification area such as *Spanish 7-12 BA*, might be reported against *Spanish BA*. There are also instances where a program may show degrees granted but no enrollments. This may occur due to the difficulty of distinquishing BA and BS enrollments in the same program; or, as may be the case with some graduate students, students will be enrolled in a doctoral program and receive a master's degree as a step in completing the doctorate. In this case the master's program would show degrees granted, but not the enrollment of the students in question since that would be displayed against the doctoral program. It is also extremely important to recognize that these reports contain lists of *academic programs*—that is, organized courses of study in a discipline leading to a degree; these are *not* necessarily the names of organizational units and resources such as academic departments. The failure to maintain the distinction between academic programs and organizational units such as departments easily leads to erroneous inferences regarding an institution's workload and the utilization of its resources.

It should be remembered that the enrollment data included in these reports is not the total official credit course enrollment for each institution; rather, it is the total enrollments of students in a program. In order to provide a complete frame of reference the tables immediately following this Introduction provide the total credit course enrollment for each institution and separately identifies those students in a program and those not in a program.

No undertaking of this magnitude could have been undertaken and completed without the active cooperation of numerous individuals. Individual campus contacts have painstakingly supplied the required data to this office on a timely basis. Space prohibits thanking each by name, but their effort is sincerely appreciated. Our appreciation is also extended to this office's statistical staff who edited the incoming data from the campuses, and the office's typing and secretarial staff who were responsible for assembling the report and arranging for its proper distribution. The computers support services required for the maintenance of the file, and the creation of reports are extensive. Our thanks are especially extended to Ms. Susan Hess of the Central Administration Computer Center. She has nutured the APIS system through its early development and has been largely responsible for maintaining and supervising the system. Her contributions to the design and production of the reports in this volume have been extensive.

NOTE: Footnote texts are on the following page.

## FOOTNOTES

[a] Original constituent institutions of the State University of New York at its establishment in 1948.

[b] Date of establishment as a state college or institution.

[c] Date of incorporation into State University of New York.

[d] As of July 1, 1975, New York City Community College and the other community colleges (not shown here) sponsored by the New York City Board of Higher Education were no longer a part of the State University of New York.

NOTE: Dates preceding date indicated for establishment as a state college or institution refer to institutional antecedents of the present college or university. These may have been private institutions or controlled by a governmental entity other than the state. Intermediate institutional developments such as other college affiliation or date of first baccalaureate program offering have been omitted for the sake of brevity.

*The Health Sciences Centers at Buffalo and Stony Brook are shown separately here from their respective campuses.
